| Hersteller Artikelnummer | KB1053                                                                                                                                                                                                                                                        |
| Alternativnummer         | KBS-KB1053-1                                                                                                                                                                                                                                                  |
| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                           |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | The GENLISA Human Interferon Gamma (IFNgamma / IFNg) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision Validated a... |
| Detektionsbereich        | 15.63 - 1000 pg/ml                                                                                                                                                                                                                                            |
| Sensitivitaet            | 7.5 pg/ml                                                                                                                                                                                                                                                     |
| Proben                   | Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids. For tear samples, please connect with us to discuss further.                                                                                            |
| Anwendungsbeschreibung   | Colorimetric, Absorbance measured at 450nm                                                                                                                                                                                                                    |
