

BIOZOL Partner Companies.

The Whole World of Science

Terms of delivery

The delivery time for most products is approx. 1-2 week(s) from receipt of order. We ship directly from Hamburg and charge a freight fee of: Germany: 21,50 € | Austria: 25,00 € | Switzerland: 67,00 € incl. AE-creation. Freight charges for other countries can be found on our website.

Surcharge dry ice shipments: 32,00 € | dangerous goods shipments: 35,00 €

Terms of payment are 30 days net.

Our General Terms and Conditions (GTC) apply to all orders.

BIOZOL - your experienced and reliable distribution partner for research and diagnostics

As a leading provider of life science products and services, we are constantly updating our portfolio to offer you the highest quality and the latest innovations. To this end, we maintain a unique global network of renowned international manufacturers, whose products we can offer you at particularly favourable conditions - many of them exclusively at BIOZOL. You will find these manufacturers listed here in our alphabetical partner overview.

Are you missing a manufacturer or a product? Then contact our dedicated technical customer service team and take advantage of our special service: global procurement of goods, regardless of manufacturer and country of origin. For you, we use our logistical experience and our established network - so that you can concentrate on your research.

BIOZOL BRANDS RESEARCH

**Cell Manipulation
Instrumentation**

Calibre Scientific | Cell Manipulation Instrumentation

Devices and accessories for bioscientific micromanipulation and microinjection, developed by Eppendorf:
TransferMan, InjectMan, CellTram, FemtoJet, PiezoXpert, Eporator

A CALIBRE SCIENTIFIC COMPANY

Chemos

Laboratory chemicals, standards and reference materials for research and the pharmaceutical industry

dianova

- Second generation immuno-oncology markers
- Antibodies for neuropathology
- Largest selection of secondary antibodies in Europe

A BIOZOL BRAND

Histoprime

Quality reagents for immunohistochemistry:
Antibodies and blocking sera

Lab-Club

Reagents and accessories for chromatography and spectroscopy:
Special lamps, Micropumps and tubes, Accessories for filtration

MoBiTec

Molecular Biology tools for the research and diagnostic market.

- Purification columns
- Vector systems for protein expression
- Cell imaging and superior fluorescence reagents

PARTNER COMPANIES RESEARCH A-Z

A

3D Bio-Tissues

Bioequivalent tissues for clinical and cellular agriculture;
City-Mix cell booster

3Helix

Collagen hybridising peptides (CHP) for direct detection of
collagen damage at the molecular level

4basebio

Kits for DNA amplification and sequencing, PCR reagents

Abbexa

Antibodies, proteins, ELISA kits for biomedical research

Abbkine Scientific

Antibodies, proteins and kits for proteomics and cytology

Abcepta

Antibodies and custom services

ABclonal

ABclonal

High-quality, personalised research reagents and services

Abeomics

Antibodies, recombinant proteins, cell Lines, ligands and
inhibitors, tissue microarrays; custom services

Abiel

Recombinant collagenases

ABITEC, Larodan Research Grade Lipids **NEW**

High-purity lipids as analytical standards (NMR, radioactive
isotopes, biochemicals, forensic standards, etc.)

Abmole Bioscience Inc.

Inhibitors and inhibitor cocktails for many signalling pathways,
kinase inhibitor library, cell counting kit

Abnova Corp.

Antibodies, recombinant proteins, cell lysates, siRNA / chimeric RNAi, antibody pairs, ELISA kits, FISH probes

ABP Biosciences

Molecular biology, protein detection, transfection reagents, cell biology products, fluorescent labelling kits

Absolute Antibody

Recombinantly engineered antibodies for research

Absolute Biotech

Antibody reagents, kits and services
Brands: Absolute Antibody, Everest, Exalpha, Kerafast, LS Bio, Nordic-MUBio

ACROBiosystems

Recombinant proteins and reagents for biopharmaceutical research and development

Active Motif

Innovative tools for epigenetic research and gene regulation research

AddexBio

Cell lines and cell line services, cell culture reagents

AdooQ Bioscience

Inhibitors, proteins, compound libraries

ADS Biotech

Genetic lab instruments, mRNA purification solutions, organoid media, custom buffer manufacturing

Advantec

Laboratory filtration

Affinity Biosciences

Antibodies and bioreagents with focus on phospho-proteins; inhibitors and siRNA

PARTNER COMPANIES RESEARCH A-Z

A

Agdia Biofords

Diagnostics for plant pathogens

Agrisera

Poly- and monoclonal antibodies against animal, plant and algal cells, bacteria and fungi

AIT France

Everything for chromatography - columns, accessories and devices, including the Smart Caps

ALPCO

Molecular and immunodiagnostic platforms and assays

Alpha Diagnostic International

Diagnostics and reagents for quality control

AlphaTecSystems

Clinical mycobacteriology: sample collection, processing and transport; controls and staining kits

AlphaThera

oYo-Link® Antibody labelling reagents

American Research Products

Antibodies, proteins, ELISA and CLIA kits

Ampersand Biosciences

Proteins, antibodies, Luminex kits, custom immunoassays

AnaSpec

GMP Grade Products for Proteomic Research

Anatrace

Detergents, lipids, reagents for protein purification, custom synthesis

Anogen

Monoclonal and polyclonal antibodies and ELISA kits, antibody-based therapeutics and diagnostics

Antibodies Inc.

Highly validated primary and secondary antibodies, IVD kits

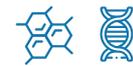

Antibodies.com

Identical antibodies and ELISA kits at reasonable prices

APExBIO

Small molecules, inhibitor cocktails, screening libraries

Apop Biosciences

Research reagents and therapeutics for the detection and monitoring of cell stress processes

Aptum Biologics

Adjuvants and buffers for immunohistochemistry

Arbor Assays

Immunoassays for research and diagnostics, antibodies and affinity columns, enzyme activity assays, detection systems

Arlington Scientific

Serum-free blocking buffers (Aquatic Block, former Seablock)

Assay Biotech

Modified antibodies and ELISA kits

Atlas Antibodies

Triple A polyclonal and PrecisA monoclonal antibodies, blocking antigens; mass spectrometry

ATTO-TEC

ATTO Fluorescence label, LS dyes, redox label

Aves Labs

IgY antibodies from chicken eggs: neuronal cell markers, epitope tag antibodies, secondary antibodies, Neuromab

PARTNER COMPANIES RESEARCH A-Z

A

Aviva Systems Biology

Rabbit polyclonal antibodies, western blot kits and control cell lysates

Bachem

Complex organic molecules: inhibitors, biochemicals, substrates, peptides etc.

Baseclick

Click chemistry-based technology for nucleic acid labelling, click reagents, cell proliferation kits, FISH

BBI Solutions

High-quality diagnostic raw materials

BellBrook Labs

High Throughput Screening (HTS) assays

Bio SB

Antibodies and detection systems for IHC, immunocytochemistry (ICC), immunofluorescence (IF), FISH & CISH

Bio X Cell

In vivo functional monoclonal antibodies

BioActs

Functional dyes and fluorescent biomaterials for in vitro diagnostics and in vivo imaging

BioAssay Systems

Assay kits for drug development and bioscientific research

BioAssay Works

Lateral Flow development: biomarker assays, gold particles for assay development, isotyping kit, conjugation kits

BioChain

Products & analysis related to Next Generation Sequencing (sequencing, qPCR, expression analyses)

BioChem Fluidics

High-quality fluidic components: Piston pumps, micropumps, valves

PARTNER COMPANIES RESEARCH A-Z

B

	BioConcept Specialized cell culture media and supplements	
	BioGenex NEW Molecular pathology systems for tumor diagnosis, prognosis, precision medicine and life science research	
 From Revvity	BioLegend Flow cytometry antibodies, IHC (IVD) antibodies, immunoassay kits, LEGENDplex™, Mojosort™	
	Biomat Surface modified microplates and tubes, PCR, ELISA; surface and coating services	
	Biomatik Antibodies, proteins, ELISA kits, biochemicals; custom protein, peptide and antibody synthesis	
	Biomedica ELISA and colourimetric assays for research and diagnostics; EZ4U cytotoxicity/proliferation assay	
	Biomedica CRO NEW Human biospecimen	
	BioPorto Diagnostics Monoclonal antibodies and immunoassays	
	Biorbyt Antibodies, ELISA kits, proteins, small molecules	
	BioServUK Ltd. Production and purification of antibodies and proteins from mammalian, bacterial and insect cells	
	BIOSS Antibodies for many areas, incl. against phosphorylated, methylated and acetylated proteins, tags, histones, and small molecules	
	Biosynth Carbohydrates, nucleosides, enzyme substrates, chemicals	

PARTNER COMPANIES RESEARCH A-Z

B

Biotez

ELISA kits (human proteases, recovery ELISA and mycotoxin), antibodies & proteins for development and diagnostics

Biotium

Antibody and protein labelling kits, fluorescent dyes, DNA and protein detection, conjugates, enzyme substrates

BioVendor

Antibodies, assays, proteins for research; IHC; miRNA kits (isolation, RT-qPCR, immunoassays); IVD

BlueGene

ELISA kits, antibodies, recombinant proteins, plasmid vectors

BMA Biomedicals

Antibodies for immunohistochemistry and immunoassays

Boster Bio

ELISA kits, validated antibodies for Western blot and IHC, cell quantification kit, electrophoresis

BrainXell

Human iPSC-derived neurons and glial cells for research and development; Brainfast media additive

BRinova

Silver nanoparticles

BT Lab

Antibodies, ELISA kits, recombinant proteins

Cape Biologix Technologies

Recombinant proteins from plant expression

Caprico Biotechnologies

Reagents and services for flow cytometry

PARTNER COMPANIES RESEARCH A-Z

C

Cedarlane

Antibodies and reagents for research and diagnostics; cell lines from CELLutions Biosystems

Cell Biolabs

Cell-based assays, oxidative stress assays, viral expression and purification, protein biology

Cellcolabs

Mesenchymal stroma cells

CETI

Medline Scientific brand for microscopes and laboratory equipment

CH3 BioSystems

Specialist in methylation biology, cell lines for research and drug development, vectors

Chem Service

High purity analytical standards

Chondrex

Antibodies and reagents for immunological research, focus on arthritis and inflammation

ChromaGenix

Synthetic affinity ligands and chromatography resins

NEW

Chromatrap

Reagents and kits for bead-free, sensitive, rapid chromatin immunoprecipitation (ChIP), qPCR, sequencing, DNA extraction and purification

Cloud-Clone

>7000 ELISA and CLIA kits for many species

Columbia Biosciences

Fluorescent dyes and antibody conjugates

PARTNER COMPANIES RESEARCH A-Z

C

Covalab

High quality antibody and assay kits: ELISA, ELISpot, Fluorospot

Creative Biolabs

Antibody production and development (antibody engineering) as a service

Creative BioMart

Recombinant proteins

Creative Diagnostics

Antibodies, viral antigens, diagnostic components

Cusabio

ELISA kits, recombinant proteins and antibodies

Cyagen

Stem cell products including embryonic stem cells and somatic stem cells, primary cells, media

Cygnus

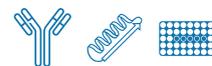

Development of highly specialised analytical reagents for the pharmaceutical and biotechnological industry

Cytoskeleton, Inc.

Cytoskeleton

Proteins and kits for drug screening and research into signal transduction and the cytoskeleton

Daresbury Proteins

Daresbury Proteins

Recombinant mammalian proteins of rare antigens, protein expression service

DB Biotech

Design and production of high-quality monospecific rabbit clonal antibodies

Dextra

Carbohydrate chemistry & CDMO services

PARTNER COMPANIES RESEARCH A-Z

D

Diacclone

Monoclonal antibodies and immunoassays, CE-certified products

DiaSource

Diagnostic antibodies and immunoassays

Diba

Innovation for liquid chromatography applications, fittings, laboratory glassware, etc.

DLDevelop

ELISA kits for biosciences and diagnostics

Dr. Ehrenstorfer

Reference materials for food and environmental analysis

Ebba Biotech

Fluorescent optotracers for neurobiology, microbiology and plant physiology

Echelon Biosciences

Assays and reagents to study lipid signaling pathways

Ecoli DX

PCR kits for clinical diagnostics and human genome testing

EdgeBio

Research reagents for sample purification and sample preparation, sequencing as a service

Elabsience

Reagents for immunodiagnostics: ELISA and CLIA kits, antibodies, proteins

Elkay

Liquipette® transfer pipettes

PARTNER COMPANIES RESEARCH A-Z

E

ELK Biotechnology

Reagents for bioscientific research

Encapsula Nanosciences

Lipid nanoparticles (liposomes)

Endotherm

High-quality low-molecular substances, compound libraries

EnkiLife

Reagents for cell culture and cell biology

Enzo Life Sciences

Cell analysis, immunoassays, IHC, flow, molecular biology, small molecules, genomics

Everest Biotech

Affinity purified goat polyclonal antibodies

Eversyn

Glycobiology tools, such as glyco-enzymes and nucleotide sugars

Exalpha

Antibodies, proliferation assays, recombinant proteins, active enzymes and GPCR membrane preparations

Exbio

Reagents for flow cytometry: monoclonal antibodies, KOMBITEST™ antibody cocktails (CE IVD), diagnostic kits

Excelitas Noblelight

Special lamps for analytical, scientific and medical applications

FabGennix

Antibodies and kits for biological research

Firebird Optics

IR windows, prisms and optical lenses

PARTNER COMPANIES RESEARCH A-Z

F

Firefly

Cuvettes and calibration standards for spectrophotometers

Fitzgerald

Primary and secondary antibodies, recombinant and native proteins, ELISA kits, serum and plasma

Fluorochem

NEW

Biochemicals, bioactive small molecules, and building blocks

Focus Biomolecules

Highest quality biochemicals and screening libraries for biomedical research

Fujifilm Irvine Scientific

Cell culture solutions, recombinant proteins

Fuller Laboratorie

Veterinary diagnostic assays for the diagnosis of vector-borne diseases and zoonoses

Future Fields

Recombinant proteins expressed in fruit flies

GeneDireX

Molecular biology: PCR, cell analysis, staining reagents, proteins

Genesee Scientific

Products for bioscientific research; protein biology, cell culture, laboratory supplies (plastic goods, etc.)

GenomeMe

IHC monoclonal antibodies for clinical diagnostic use

GeneTex

Quality antibodies and reagents for many species and research areas

PARTNER COMPANIES RESEARCH A-Z

G

GenScript

Antibodies and recombinant proteins for research, protein analytics and molecular biology, cell lines

GenuIN Biotechnologies

shRNA knockdown (KD)-validated antibodies, viral particles, kits

Green Mountain Antibodies

Monoclonal antibodies against plasma antigens, control antigens (IgG, BSA, ovalbumin, etc.), bovine immune markers; customised production of monoclonal antibodies

HansaBioMed

Exosomes and microvesicles, tools and kits for EV isolation and characterisation

Hardy Diagnostics

Diagnostic kits for microbiology, culture media, rapid tests, food analytics

Hello Bio

Low-cost antagonists, inhibitors, receptor ligands, antibodies and fluorescence tools

High Purity Standards (HPS)

High purity calibration standards

highQu

Premium enzymes, mixes for PCR, qPCR, kits for NGS, cloning, stains for DNA and protein electrophoresis

Hillgene

BlueKit detection kits for quality control in biotechnological production

HUABIO

Monoclonal and polyclonal as well as phospho-, acetyl-, methyl- and hydroxyl-modified antibodies

Hycult Biotech

Antibody and ELISA kits for innate immunity, inflammation, cell and tissue damage; diagnostics

PARTNER COMPANIES RESEARCH A-Z

IBA

Cloning, transfection and cell isolation; protein biochemistry, Streptamers & ImmunoMag

IBI Scientific

Laboratory equipment (Belly Dancer shakers etc.), electrophoresis and reagents for molecular biology

ICL

Quality antibodies and immunoassays for research and diagnostics, antigens, reference standards

IHC World

Products for immunohistochemistry: antibodies, staining and detection systems, reagents and kits

ImmunoChemistry

Immunoassays for basic research, focus on cell viability and apoptosis

ImmunoReagents

Secondary antibodies from different species, immunodiagnostic primary antibodies

Immunostep

Flow cytometry antibodies and kits for research and diagnostics

ImmuQuest

Monoclonal Antibodies

Indical Bioscience

Veterinary diagnostic assays & reagents, sample preparation and plasticware; SVANOVIR® ELISA kits

Ingenetix

Realtime PCR kits for veterinary and human diagnostics

Invent Biotechnologies

Technologies for protein extraction and analysis

PARTNER COMPANIES RESEARCH A-Z

ION Biosciences

Ion transporter-focused translational research: fluorescent indicator dyes, assays, assay development

IPHASE Biosciences

In-vitro biological research reagents: organoid culture media cells, assays, matrices

IQ Products

Antibody-based diagnostic kits, especially for flow cytometry

Isca Biochemicals

High-quality peptides and biochemicals

Jackson ImmunoResearch Lab.

Comprehensive range of secondary antibodies, conjugates and affinity-purified immunoglobulins

Kamiya Biomedical Company

Immunoassays for research and diagnostics

Kementec

Substrates and buffers for immunoassays, labels and conjugates

Kerafast

Rare and unique reagents, antibodies, cell lines, small molecules

Krishgen Biosystems

High quality niche immunoassays

Lampire Biological Labs

Antibodies and biological materials (blood, tissue)

Leadgene Biomedical

Proteins and antibodies in GMP quality, diagnostic assays, virus reagents, IVD raw materials

PARTNER COMPANIES RESEARCH A-Z

LGC Standards

High quality reference standards and biochemicals
> Dr. Ehrenstorfer > Mikromol > Toronto Research Chemicals

LifeSpan Biosciences

Rabbit antibodies for immunohistochemistry, IHC-plus™, Pathplus™, immunoassays

LifeTein

Specialist in peptide synthesis; peptides, proteins, antibodies, amino acids; synthesis services; COVID-19

LIPOSOMA research

Liposomes, control liposomes, fluorescent liposomes

L

List Biological Laboratories

Bacterial toxins for research and vaccine development

LKT Labs

Biochemicals for cancer biology, neuroscience and others; custom synthesis and analytics

Lybe Scientific

Nucleic acid extraction kit NAXtra™

Mabtech

High-quality monoclonal antibodies and kits for ELISA, ELI-Spot and FluoroSpot

magtivio

Magnetic beads for separation of biomolecules, DNA clean-up, protein analysis, immunoassays

Matriks Biotek

SHIKARI® ELISA kits

MaxVision Biosciences

Immunofluorescence detection systems, antibodies

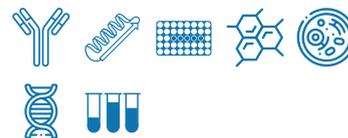

PARTNER COMPANIES RESEARCH A-Z

M

MBL Int.

Products for cell biology research and diagnostics: MHC tetramers, CoralHue™ vectors, IL18, antibodies, transfection reagents, proteins, assays

MedChemExpress

Active biochemicals / small molecules, reference standards, APIs, inhibitory antibodies

Medix Biochemica

Antigens, antibodies and specialised reagents for immunoassay development

MedSchenker

Devices for sample collection and sample transport, CavSwabs, laboratory supplies

Merck Millipore

Sample preparation, separation, filtration and monitoring

Mikromol

Top-quality reference standards

Mirus Bio

Transfection reagents & nucleic acid labeling tools

Molecular Dimensions

Crystallography products for structural biology (screens, reagents and accessories)

Monosan

Research antibodies for IHC, IC, FC, WB; Monosan Xtra and RTU: Antibodies for IHC routine laboratories

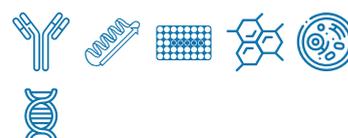

Montana Molecular

Fluorescent biosensors for live cell discovery

MP Biomedicals

Immunology, molecular biology, biochemicals, chemicals, cell culture

PARTNER COMPANIES RESEARCH A-Z

MS Validated Antibodies

High-quality, extensively validated monoclonal antibodies for immunohistochemistry

MyBioSource

Research reagents (antibodies, ELISA kits, proteins)

NABAS

Affinity purified polycl. antibodies (IgY) from chickens

nanoComposix

World's largest variety of metal nanoparticles for biomedical applications

Nanohelix

Reagents for molecular diagnostics, DNA/RNA purification and amplification, detection kits

Nanoimmunotech

Nanoparticles for bioconjugation

M

Nanoprobes

Gold nanoparticles with particularly high sensitivity

NanoTag Biotechnologies

Recombinant antibody tags from llama and alpaca

NeoBiotechnologies

Monospecific monoclonal antibodies for research from mouse and rabbit

Neuromics

Cells, cell culture reagents, cell-based assays, proteins, antibodies, DNA reagents

Nexotech

ExoGAG exosome purification kits

NeXtal Biotech

Protein crystallisation screens and plates

PARTNER COMPANIES RESEARCH A-Z

Nordic BioSite

Antibodies, proteins, kits & assays for medical research and diagnostics

Nordic-Mubio

Antibodies for flow cytometry, Fix & Perm; IHC antibodies from BioLogo

NSJ Bioreagents

High-quality mono- and polyclonal antibodies, recombinant antibodies

NZYtech

Premium-grade enzymes, mastermixes, and kits for molecular research and diagnostics

OaCp

Oncology and cytogenetics products (FISH), Covid tests

Oasis Diagnostics

Saliva collection tools

ONCOdianova

Cancer immunological checkpoint biomarkers

OSRAM

Special lighting for medical and scientific applications

Oxford Biomedical Research

Assay kits, recombinant proteins and antibodies for R&D; focus on oxidative stress and inflammation

OZ Biosciences

Technologies for transfection and transduction: magnetofection™, lipofection and 3D transfection

PanPath

Diagnostics for the pathology market: HPV screening, EBV detection, CISH, FISH, ISH (IVD and RUO)

N

PARTNER COMPANIES RESEARCH A-Z

PBL Assay Science

Highly sensitive ELISA kits, interferon proteins, antibodies; Assay Service

Peptides&elephants

High quality peptides
PEP-LIPS®: customised peptide libraries

POLY - DTECH

Poly-DTech

Fluorescent nanoparticles and immunoassays for research and diagnostics

Pricella

Cell culture media and reagents

Primerdesign

Kits and reagents for quantitative real-time PCR

ProFoldin

Drug discovery, drug delivery, biochemical assays, membrane protein sciences

ProSci

Monoclonal, polyclonal and single domain antibodies, recombinant proteins, immunoassays and cell lysates

P

ProSpec

Bioactive proteins, recombinant proteins, cytokines and growth factors, antibodies

ProteinArk

Protein expression, purification, filtration, electrophoresis

ProteoGenix

ProteoGenix

Custom development of assays and therapeutic antibodies

Qkine

Growth factors and cytokines

RayBiotech

Proteomic discovery tools

SCETI
SCETI K.K.

SCETI

Antibodies, ELISA kits, proteins and reagents for molecular biology

ScyTek
LABORATORIES INC.

ScyTek

Reagents for diagnostic immunohistochemistry: antibodies, staining reagents, detection systems

SeLENOZYME

Selenozyme

Customised recombinant selenoproteins using unique technology

Selleckchem.com

Selleck

Kinase inhibitors for research into signal transduction, including 2,000 bioactive small molecules

SIGNALCHEM
BIOTECH

SignalChem

Recombinant proteins for research into cellular signal transduction; focus on human enzymes and targets

SIGNALCHEM
DIAGNOSTICS

SignalChem Diagnostics

In vitro diagnostics (IVD) solutions: molecular diagnostics, clinical chemistry, immunodiagnostics

SB Sino Biological
Biological Solution Specialist

Sino Biological

Recombinant proteins, high-affinity monoclonal antibodies from rabbit and mouse, ELISA kits

S

somagenics

SomaGenics

Realtime-qPCR for miRNAs and other small RNAs

SouthernBiotech

SouthernBiotech

Secondary antibodies of highest quality, Fluoromount-G

Spherotech
Let the Possibilities Flow...

PARTNER COMPANIES DIAGNOSTICS A-Z

G

Generic Assays / Medipan

IVD: ELISA, radioimmunoassay, immunofluorescence assays; specialised in differential diagnosis of autoimmune diseases

GenomeMe

IHC monoclonal antibodies for clinical diagnostic use

Gentian

Turbidimetric immunoassays (PETIA) for diagnostics

Hardy Diagnostics

Diagnostic kits for microbiology, culture media, rapid tests, food analytics

HUMAN

IVD: clinical chemistry, haematology, CLIA/FIA/LIA, ELISA, isothermal amplification (LAMP)

Hycult Biotech

Antibody and ELISA kits for innate immunity, inflammation, cell and tissue damage; diagnostics

Immunostep

Flow cytometry antibodies and kits for research and diagnostics

Ingenetix

Realtime PCR kits for veterinary and human diagnostics

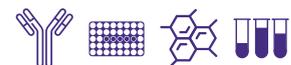

IQ Products

Antibody-based diagnostic kits, especially for flow cytometry

Kamiya Biomedical Company

Immunoassays for research and diagnostics

Leadgene Biomedical

Proteins and antibodies in GMP quality, diagnostic assays, virus reagents, IVD raw materials

Monosan

Research antibodies for IHC, IC, FC, WB; Monosan Xtra and RTU: Antibodies for IHC routine laboratories

BIOZOL - Largest German distributor and reliable manufacturer of high quality life science and diagnostic products

As a leading provider of life science products & services we continually update our portfolio to ensure we offer the highest quality products & latest innovations.

All your needs for research & IVD, in one resource:

- Global supplier network
- Manufacturer of research reagents and devices
- Easy and transparent ordering process
- Qualified and dedicated customer service
- Technical support with academic scientific background

Terms of delivery

The delivery time for most products is approx. 1-2 week(s) from receipt of order. We ship directly from Hamburg and charge a freight fee of: Germany: 21,50 € | Austria: 25,00 € | Switzerland: 67,00 € incl. AE-creation. Freight charges for other countries can be found on our website. Surcharge dry ice shipments: 32,00 € | dangerous goods shipments: 35,00 €
Terms of payment are 30 days net. Our General Terms and Conditions (GTC) apply to all orders.
