

Rabbit Complement,

CatNo **RAC0120**

BatchNo: See Label

Expiration Date: See Label

Storage: 2 – 8°C°C lyophilized

After Reconstitution: -70°C

Volume/Quantity:	2 ml
Product Form:	Rabbit serum - lyophilized
Reconstitution:	Reconstitute with 2.0 ml ice cold distilled water
Preservatives Stabilisers:	None present
Product Information:	This rabbit serum is intended for use as a source of rabbit complement for cytotoxicity investigations and HLA-ABC tissue typing. This material will appear cloudy after reconstitution. The cloudy appearance is a result of the lyophilization process and does not affect potency. Use within one hour of reconstitution, keeping on ice throughout.

Applications:	Suggested Working Dilution
Functional Assays (1)	Yes
Immunoassay	Yes

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product is not sold as sterile but can be sterilized by filtration if necessary. It is preferable to dilute the complement to a final working concentration before filtration in order to minimize loss of volume

Storage Conditions:	This product is shipped at ambient temperature. Prior to reconstitution store at +4°C. Following reconstitution store at +4°C for 1 hour or aliquot and store at -70°C for longer. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the product. Should this product contain a precipitate we recommend microcentrifugation before use (A full Health and Safety assessment is available upon request)
