SARS-CoV-2 Mutants Statement

To whom it may concern:

This declaration applies to the following product from MP Biomedicals Germany GmbH:

Product Name: Rapid SARS-CoV-2 Antigen Test Card

- The Rapid SARS-CoV-2 Antigen Test Card is designed to detect SARS-CoV-2 via identification of the **N protein** (Nucleocapsid). The SARS-CoV-2 N protein is a much conserved protein among coronaviruses.
- In the new mutant variants, for example that of VOC1 Kent, UK, B.1.1.7 and VOC2 South Africa, B.1.351, the significant mutations occur in the **S protein** (Spike).
- Changes in the Spike protein will not interfere with the performance of the Rapid SARS-CoV-2 Antigen Test Card.
